

1.Aluminum Extrusions.

We have 35 extruders from 500Tonnage to 5500Tonnage and most of presses are imported from Europe and USA. Now the output of aluminum extrusions is 100000 tons one year.Main equipments are below:

※ A glimpse of advanced and environmental electrolytic workshop

※Advanced internal-led hydraulic casting and airsliplubricated casting technology imported from U.S.A.The max diameter of billet could reach 381mm

※ Extrusion Presses from 5MN to 55MN

※Aluminum anodizing equipment, the key technology of which was introduced from France and Italy, produces sections in various colours like silvery white, bronze, champagne or light golden.

※Vertical Powder Coating Line

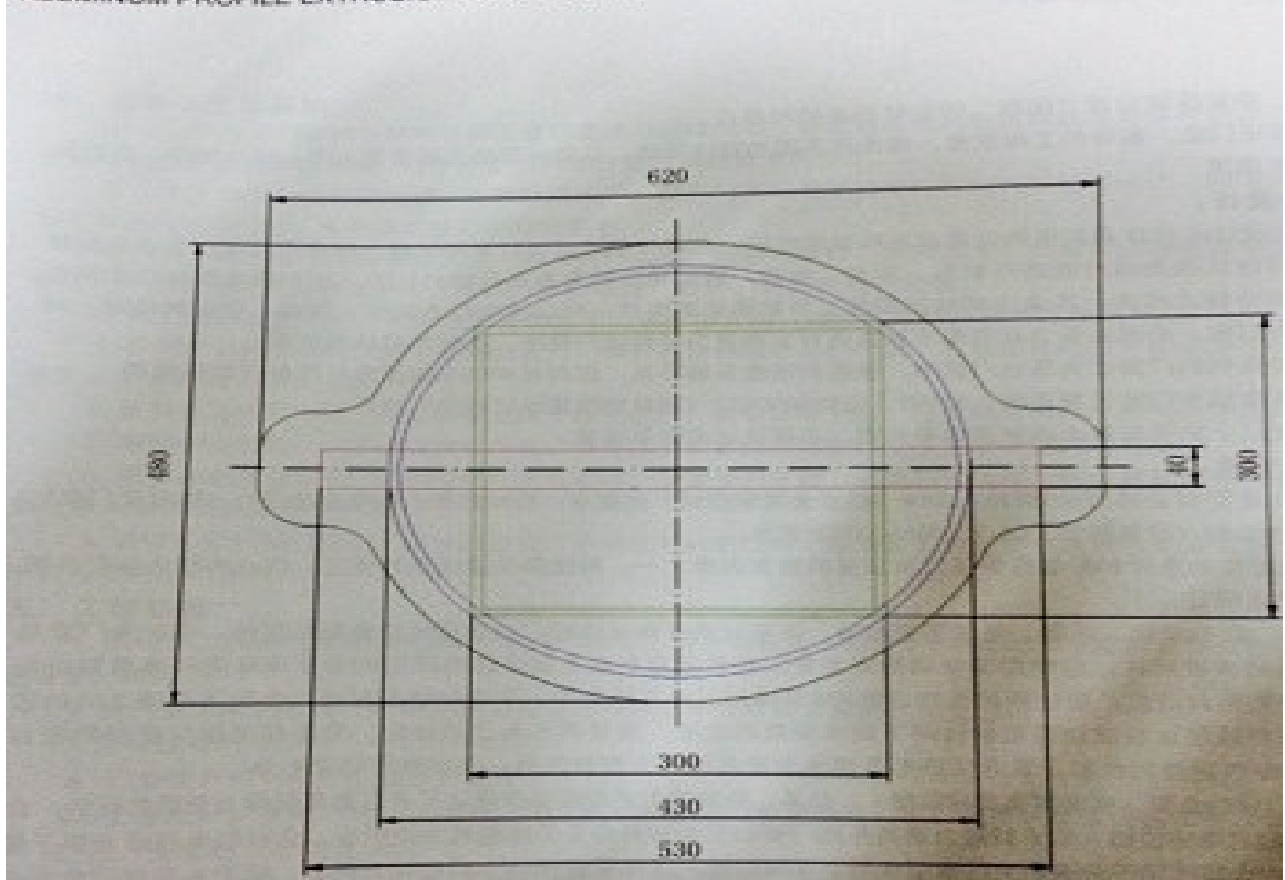

Extrusion Division Capabilities:

- Extrusion Size below:

铝型材最大挤压尺寸

ALUMINIUM PROFILE EXTRUSION LARGEST SIZE

- Alloys:1050,3003,5052,6060,6063,6463,6005,6061,6082,7003,7075
- Tempers:F,T4,T5,T6
- Profiles Extruded: Solid,Hollow,Semi-Hollow,Abnormity

2.Laboratory Capabilities:

- Material Certification;Spectrographic Analysis,Mechanical Property Testing.
- Material Analysis:Hardness,Chemistry,Magnified Photography& Inspection,Chemical Etch,Crush Simulation and Testing,Flare Testing.

3.Quality System:

- TS16949,ISO9001,ISO14001,OHSAS18001
